

IT Means Being Accessible To The World

You need the benefits of powerful hardware, network infrastructure, and software upgrades in a secure environment. You worry about proper maintenance - backups, licensing, and security updates. The solution is a hosted solution that is reliable and secure, provided by AT's expert technical and consultancy staff.

We can host your entire **server infrastructure** or components or sub-parts for it such as email, Windows SharePoint or your website.

E-mail

Your staff can utilize mail services, calendaring, contacts and tasks from an AT hosted server. You will be able to send, receive, and view mail from the main office or from any other location with an Internet connection.

SharePoint Services

SharePoint Services helps teams stay connected and productive by providing easy access to the people, documents, and information they need to make more informed decisions and get the job done.

iSecure, the SharePoint Services plug-in written by AT, will allow you to customize authentication and security for users to match the design within your membership system.

Websites

A powerful web server is typically the first of many purchases and ongoing expenditures necessary for hosting a web site. Let AT host your site. Since time is money – you will save both by not having to manage hardware, or spend the time making sure you are both current and properly licensed.

Benefits of Hosting with AT:

- Reduced upfront implementation costs - no need to purchase, house, maintain new equipment
- Maintenance and upgrades for hardware included in hosting fee
- No need for climate controlled storage for server/back up equipment
- Domain Controller offsite – great help in the event of a disaster recovery process
- Accessible anywhere, remotely via an internet connection
- Software licensing is no longer your concern – you will be properly licensed and in compliance
- Expert technical and consultancy services with local provider
- Back ups are performed by AT at our facility
- Hosted solution managed by AT, a Microsoft Gold Certified Partner
